Preparation and Cooking Instructions Remove desired number of rolls from case. Immediately return remainder of case to freezer. Arrange on a well-greased sheet or cake pan, leaving approximately 1 inch between rolls on all sides. For muffin pan rolls, place one roll in each cavity of a well-greased pan. For best results, let rolls thaw at room temperature for 1-2 hours or in a cooler or retarder overnight (alternate: rolls may go directly from freezer to proofing stage, but a low humidity setting should be used in the proofer to prevent condensation on the rolls), cover the rolls during thawing to prevent dehydration. Proof for 60-90 minutes in a proofer or warm, draft free area. Rolls should approximately triple in size. Bake: convection oven: 325 degrees for 7-9 minutes or until golden brown. Conventional oven: 375 degrees for 8-10 minutes or until golden brown. Drizzle with icing and serve hot or turn out of pan to cool and ice later. To store, cover rolls with plastic or place in a sealed container. Reheat: Conventional oven: cover with foil and heat 10-15 minutes at 250-300 degrees. Microwave: cover with a paper towel and heat on medium for 10-15 seconds per roll.
