Preparation and Cooking Instructions Remove desired number of frozen rolls from case. (One layer of 60 rolls will fill a standard 18 x 26 baking sheet pan.) Gently separate the individual rolls and arrange evenly on a greased sheet pan. The gap between rolls should be about 1 inch. Brush any excess flour from rolls at this time. Allow rolls to rise in a proofer or a warm, draft free area for approximately 1 and 1/2 hours or until they are at least 3 times their original size. (Raising may be accelerated by placing pre-panned rolls in a retarder or cooler overnight (about 40 degrees); pans must be well covered with plastic to prevent dehydration of the rolls.) Bake in a preheated 325 degree convection oven (375 degree conventional oven) for 12 to 14 minutes or until golden brown. To maintain a soft crust, brush with melted butter or margarine while still hot. Turn out onto a cooling rack and cool for 5 minutes before serving.
